# beiderbeck 3 prototype

We realize your product idea into 3D-datas, over the model to the functional sample or the post- or small series. The completeness and constantness of our possibilities shortens your development time and optimises your result.

## rapid prototyping:

- laser sintering
- stereolithography
- vacuum casting

## rapid tooling:

- 2D/ 3D highspeed milling
- design/ working models
- full service prototyping
- reproduction
- small batch series

## finishing:

- chrome optics
- spraying metal
- soft touch
- special coatings
